EDUCATION

Doctor of Philosophy
2014-2018(*expected*) Bar-Ilan University
Conducts research in computational linguistics at Bar-Ilan's NLP lab, under the supervision of Prof. Ido Dagan.

Master of Science
2009-2012 Ben Gurion University
Graduated with Honors (Thesis Overall Grade: 97; Thesis Defense Grade: 100)
Thesis title: *Hebrew Paraphrase Identification*
Conducted research in the field of Hebrew natural language processing, under the supervision of Prof. Michael Elhadad.

Bachelor of Science (Academic Reserve)
2004-2007 Ben Gurion University
Undergraduate Project: *Saya Speech Synthesis*
Integrated compatible speech gestures for the department robot receptionist, under the supervision of Prof. Shlomi Dolev and Michael Orlov.

FELLOWSHIPS

2015 – 2016 IBM Ph.D. Fellowship award

WORK EXPERIENCE

IBM Research
2016 Research Intern
Summer internship in San Jose, California, under the supervision of Pablo Mendes and Daniel Gruhl. Designed recurrent models which integrate external knowledge from Wikipedia to identify adverse drug reaction mentions in patient narratives. This work appears as a long paper in the proceedings of EACL 2017.

Allen Institute for Artificial Intelligence (AI2)
2015 Research Intern
Summer internship in Seattle, Washington, at AI2's Euclid team under the supervision of Mark Hopkins. Explored the use of cascading tree transducers to solve geometric problems consisting of text and accompanying diagrams.

Bar-Ilan University
2015 - Teaching Assistant
Designed and graded the course project for the Text Understanding course, under the supervision of Prof. Ido Dagan. The project guides students in developing an alignment based entailment system using various lexical resources (WordNet, PPDB, etc.).

Israeli Air Force
2011 – 2013 Avionic Software Team Leader
Led a team of 4 engineers in the development of an encoder-decoder software product. The team implemented advanced and self-tailored compression and

decompression algorithms. The implementation had to conform to rigid standards: embedded, hard real time, portable and lightweight.

Israeli Air Force	2009 – 2011	Avionic Software Team Leader	Led a team of 3 engineers in the software development of an airborne aircraft. Designed and implemented various improvements to reduce run time and memory usage. <i>Received the unit's excellence award for the performance in this position</i>
	2007 – 2009	Avionic Software Developer	Worked as part of a team of 4 engineers which developed an embedded real-time abstraction over the operating system of an airborne aircraft. This work was performed under extremely limiting and challenging computational resources.
Ben Gurion University	2007	Academic Grader	Worked as a grader for the 2007 Systems Programming course. Graded three large scale programming assignments of over 100 students. Under the supervision of Prof. Michael Elhadad and Dr. Meni Adler.
